

UP TO 9 OPERATOR READY REMOTES PER MACHINE

CHOICE OF FOUR DIFFERENT TRANSMITTERS

POCKET-CLIP – Easy to hold wireless emergency stop switch that's vertically actuated and easily passable.

QUANTUM – larger belt-worn transmitter that's vertically actuated, and a horizontally actuated wireless kill switch.

MEGA – Glove-ready wireless E-Stop switch that's built for the harshest environments.

WALL MOUNT – A fixed option for situations where safety comes first and nothing is left to chance.

- All transmitters and receivers are two-way radios in a mesh configuration that give you a real-time LED indication of machine status and radio link.
- 2 independent solid-state sourcing outputs rated for 5A each – one which is normally ON and turns OFF in an E-Stop condition.
- When the E-Stop switch is returned to neutral/safe, the remote is reset to an ON condition.
- Safety Integrity Level (SIL) 3 based on the IEC61508 standard and Performance Level (PL) e based on EN ISO 13849-1.

All Kar-Tech radios include:

- Intelligent power management
- EasySync RF teach
- Two-way communication
- Actively protected & monitored I/O
- Real-time feedback
- Active safety checking

FREQUENCY
2.4 GHz, 900MHz

BATTERY
LiPoly, AA Batteries

RANGE
600', 4000'

CHARGE
USB, Replacement,
Magnetic Rechargeable

*Custom configurations
also available to
fit any application.*
